These storage systems have a total capacity of 290 MWh (88 MWh for the ENEOS Muroran Plant and 202 MWh for Chiba Refinery of Osaka ...

Osaka, Japan's third-largest city, faces unique energy challenges: high population density, limited land, and aging infrastructure. Yet, it's emerging as a model for wind, solar, and storage integration.

From urban skyscrapers to remote mountain lodges, Osaka's photovoltaic containers prove that big energy solutions can come in smart, modular packages. What will you power next? Visit our Blog to ...

Japanese mobile solar container power station A revolutionary floating solar power plant featuring over 50,000 solar panels, designed to generate clean energy without taking up a single square meter of ...

As Osaka accelerates its transition toward renewable energy, outdoor energy storage systems are emerging as game-changers. This article explores how innovative projects like the Japan Osaka ...

Utility Osaka Gas and developer Sonnedix are installing a battery energy storage system (BESS) at the latter's 38.7MW Oita solar project, which ...

Through a joint investment (50% each) in GDSPJ2 LLC, we will develop five solar power plants in Japan with a combined capacity of approximately 7,000 kW. Construction of the Power Plant is scheduled ...

These modular systems combine solar panels and battery storage in portable units, offering scalable energy solutions for industries ranging from urban infrastructure to disaster relief operations.

One symbolic example was the "Sorais" solar-powered bench, designed using reused solar panels. The bench provided lighting and device charging while offering visitors a comfortable ...
