Landsnet's transmission system - "the grid" - carries electricity from generation companies to utilities and power-intensive industries. The grid includes more than 3,000km of transmission ...

OverviewConnection to the rest of EuropeProduction and ConsumptionTransmissionDistributionCompetitionThere are plans to connect the Icelandic grid with the UK using a subsea High-Voltage DC (HVDC) interconnector, with a potential capacity of up to 1.2GW, called Icelink. It would be the world's longest submarine HVDC cable, if built. This would allow Iceland to export excess energy to UK and in turn linking it to a wider European super grid. The project is in planning stages and is controversi...

We provide the lowest-cost electricity in New York State and we're the only statewide electricity supplier. Economic development is a top priority for the New York Power Authority. Our ...
