-----

Energy storage research at the Energy Systems Integration Facility (ESIF) is focused on solutions that maximize efficiency and value for a variety of energy ...

The National Renewable Energy Laboratory's (NREL) final report on the future of storage presents "key learnings" from a series of six in-depth studies.

This report is the seventh and final publication from the National Renewable Energy Laboratory's (NREL's) Storage Futures Study (SFS). The SFS is a multiyear research project that explores how ...

NREL's final report on the future of storage, drawing from a series of six in-depth studies, presents "key learnings" from across those studies.

Renewable plus storage plants are also increasingly cost competitive. Renewables can help accelerate the storage tipping point and increase the overall market size.

Significant deployment of energy storage can successfully balance load and meet demand at all hours while also helping electricity grids run more ...

Storage Futures Study NREL is analyzing the rapidly increasing role of energy storage in the electrical grid through 2050.

This report is the final in NREL's Storage Futures Study, a multiyear research project that explored the role and impact of energy storage in the evolution and operation of the U.S. power sector.

NLR researchers are designing transformative energy storage solutions with the flexibility to respond to changing conditions, emergencies, and growing energy demands--ensuring energy is ...
