We design and engineer custom Solar Power Systems for Oilfield Services, Gas Pipelines, Off-shore Drilling, Injection Sites, Wellhead Locations and Related Oil and Gas Service Companies.

Oil & gas and other industrial users around the world can use reliable & cost-effective solar electricity to remotely power their essential systems.

We provide solar-powered and hybrid systems engineered for remote or stand-alone applications. These systems are ideal for areas prone to lengthy weather ...

Our on-site solar energy kits are capable of providing all necessary power without the need of a grid. Our reliable design means there will be no lapses of power, ...

Safety designs such as water and electricity separation, three-level fire protection + explosion venting + exhaust, liquid cooling + dehumidification design, all ensure the safety of the energy storage ...

Designed for energy storage systems for solar power, diesel-PV hybrid, and EV charging integration, this cabinet offers a flexible and scalable solution for ...

The solar battery equipment cabinets are made specifically for the solar industry with an aim to make installations safer and easier for consumers. Tailored to fit your specific needs, available in different ...

The SOLARIS 3000 stands as a tailor-made to provide reliable DC (24 / 48 VDC) and AC (120 VAC) power for essential operations in remote ...

Most industrial off-grid solar power systems, such as those used in the oil & gas patch and in traffic control systems, use a battery or multiple batteries that need ...
