As your EV battery packaging partner, we can help optimize your battery production and transport more effectively than anyone else. Powering your supply chain so you can move more batteries, more ...

A battery pack consists of four core elements: battery cells configured in series or parallel, a Battery Management System (BMS) for monitoring and control, thermal and voltage ...

Starting out in Battery Design? Check out Battery Basics as this will walk you through from chemistry to pack. More advanced and you want to dive into a particular aspect of the design the A to Z lists all of ...

Most EV battery packs are built from groups of cells housed in modules interconnected within a case that provides structural support, thermal ...

Battery cells must be packed ever more densely in order to meet the increasing targets of very high energy density at pack level. Cell-to-pack design approaches aim to integrate battery cells ...

A battery pack is a collection of one or more individual batteries that are connected together to store and supply electrical energy. A battery pack provides portable power for various ...

Our automotive battery packs fully encapsulate and protect the battery during shipment. The benefits of these battery packaging options include nesting capabilities for better return ratios, less storage ...

Learn how cell-to-pack designs are revolutionizing EV batteries with improved efficiency, lower costs, and enhanced safety features.

Discover different battery packaging types, safety rules, and how proper packaging impacts performance. Learn about lithium, solar, car battery ...

Discover expert tips on Battery Packaging for shipping lithium batteries safely. Learn the IATA rules, avoid

Pack battery packing

shipment delays, and see what experts recommend.
