Peak Energy, a Denver-based battery manufacturer, announced today the launch of the first grid-scale sodium-ion pyrophosphate (NFPP) ...

Under the agreement, Peak will deliver 720 MWh of storage in 2027 - the largest single sodium-ion battery deployment announced so far. The deal ...

Under the phased contract, Peak Energy will deliver approximately 720 MWh in 2027, which will become the largest single deployment of sodium-ion battery systems announced to date. ...

Peak Energy, a U.S.-based company developing low-cost, giga-scale energy storage technology for the grid, today announced the deployment ...

Sodium-ion battery energy storage system (BESS) startup Peak Energy has launched and shipped its first sodium-ion BESS to be deployed in a ...

"The system is dead-simple with no moving parts, no planned maintenance, and negligible aux loads. It's the lowest total-cost grid storage ...

The successful operation of the U.S.'s first grid-scale Sodium-ion Battery system positions Peak Energy as a pivotal player in the energy storage industry. With its cost-effective and ...

Peak Energy designs and deploys next-gen sodium-ion energy storage that is safer, lower-cost, and more reliable. Our systems remove legacy ...

Peak Energy designs, manufactures, and delivers next-generation energy storage systems that enable the rapid, reliable, and resilient growth of the electricity grid. ...
