The Federal Energy Management Program (FEMP) provides this tool to federal agencies seeking to procure solar photovoltaic (PV) systems with a customizable set of technical specifications.

Design with GII built specifically for grid-interactive connection photovoltaic arrays to utility, and capable of automatic, continuous, and stable operation over the range of voltages, currents, and power levels ...

Home Policies and Guidelines Policies and Guidelines

As SPV array produce direct current electricity, it is necessary to convert this direct current into alternating current and adjust the voltage levels to match the grid voltage. Conversion shall be ...

In the event that any Applicable Law or Industry Standard does not govern specific features of any item of Equipment and Materials, Temporary Work or system, Contractor or Original Equipment ...

This chapter will help stakeholders to identify risks in the procurement process of components (such as PV modules, inverters) and to mitigate them through ...

Section Vi Tech Specs (1) - Free download as PDF File (.pdf), Text File (.txt) or read online for free.

Imagine trying to sell snowshoes in the Sahara - that's what happens when your photovoltaic inverter bid misses technical specifications. The heart of any solar energy system isn't the panels ...

Learn about the essential elements of a solar RFP; receive introductory guidance on how to evaluate any proposals received; and be ...

Purchase PV modules and inverters that meet EPEAT criteria.
