raicoon AOC is a software platform for renewable energy systems utilizing artificial intelligence & machine learning to make autonomous data-driven decisions.

Solar AOC cameras aren't just gadgets; they're essential tools for competitive, sustainable farming. By slashing costs, preventing losses, and enabling data-driven decisions, they're reshaping agriculture ...

Each year, the U.S. Department of Energy (DOE) Solar Energy Technologies Office (SETO) and its national laboratory partners analyze cost data for U.S. solar ...

AIKO's ABC modules are built to deliver high power, bigger returns, and guaranteed long-term performance -- even under the most demanding site ...

This report presents a performance analysis of 75 solar photovoltaic (PV) systems installed at federal sites, conducted by the Federal Energy Management Program (FEMP) with support from National ...

ICC Digital Codes is the largest provider of model codes, custom codes and standards used worldwide to construct safe, sustainable, affordable and resilient ...

The recently dedicated Hart Senate Office Building solar panel system is one of the largest federal systems in the Washington, D.C. area. The ...

As part of the project, the AOC also installed a 148 kW photovoltaic system on the Hart roof. The solar panels will decrease utility use, increase sustainability and ...

The Section 201 tariffs were imposed on imports of solar PV cells and panels from all countries except for certain developing countries. The tariffs included a quota ...

The Solar office supports development of low-cost, high-efficiency photovoltaic (PV) technologies to make
