The rapid adoption of solar power in northeast Syria, in areas controlled by the Democratic Autonomous Administration of North and East Syria (AANES), has ...

This investigation is based on interviews with 25 individuals, including loan beneficiaries, engineers, contractors, importers, and bankers, as ...

Due to frequent blackouts and damaged grid infrastructure, Syria primarily uses photovoltaic (PV) solar systems, particularly off-grid and hybrid setups with battery storage, for ...

The Huijue Group Off-Grid Solution comprises three main components: photovoltaic systems, energy storage systems, and off-grid systems, enabling energy self-sufficiency. This solution is scalable, ...

We developed a comprehensive spatial decision-support model using GIS and Multi-Criteria Decision Analysis (MCDA) to identify the most suitable locations for large-scale photovoltaic ...

Recently, Syria's state-owned General Electricity Transmission and Distribution Company officially signed an agreement with the Syrian-Turkish ...

This study presents a national-scale comparative techno-economic evaluation of concentrated solar power (CSP) and photovoltaic (PV) systems across 14 Syrian governorates using ...

The project aims to showcase how solar energy can act as a key driver for rebuilding Syria's energy infrastructure, promoting economic recovery, ...

According to the government, the project will increase the country's renewable energy capacity and contribute to curbing power outages. This ...
