Observatório Fotovoltaico, a Portuguese service platform for the solar industry, has developed a free, web-based, interactive map of PV projects ...

A new solar project, to be based in the Portuguese district of Castelo Branco, is being widely opposed by both environmental organisations and the municipalities themselves.

It will be EDP's largest photovoltaic project in Europe, involving an investment of EUR115 million, and when completed will have a capacity of 242 ...

Portugal's Pracana hybrid plant pairs 90,000 solar panels with hydropower, using the sun and water together to generate 140 GWh of clean and safe energy.

Given the steep terrain and poor road networks common to much of Portugal's forest area, the costs of extraction and transport of forest residues are high. In many cases it is only economically viable to ...

With a capacity of 147 MWp, the Margalha solar tracker project represents a significant milestone in our commitment to a cleaner, more sustainable energy ...

The facility -- a model of clean power generation integrated with agriculture -- is in one of Europe's sunniest areas, in Portugal's Alentejo agricultural region in the town of Serpa, 200 ...

Built by EDP, a Portuguese electric utility company will generate 7.5 GWh a year and power around 1,500 households in the region, more than 30% ...

Nestled atop the Alqueva Reservoir, the newly unveiled floating solar power farm is not just an engineering marvel -- it's a blueprint for the future. This single floating solar farm is capable ...

Invest in your future with our bespoke photovoltaic systems in the sun-kissed Algarve region! Boasting an

Portugal s forest solar power system

average of 3,000 hours of sunshine per year, this ...
