Lisbon - December 17, 2025 - Hyperion Renewables has begun construction of its first battery energy storage system (BESS) projects in Portugal, marking a milestone for the country's grid modernization ...

The Portuguese government plans to invest up to 400 million euros (\$466 million) to improve grid management and boost battery storage following ...

Hyperion's first battery storage projects in Portugal, located in Estremoz and Évora. Co-located with solar PV plants, enabling energy to be stored during peak production hours.

Two hybrid projects with more than 630 MWh of battery storage planned in Portugal Lightsource bp is planning an 867 MWp solar and 300 MWh ...

Portugal has announced plans to invest up to EUR400m (\$466m) to strengthen its electricity grid and increase battery storage capacity, according to ...

As Portugal accelerates its renewable energy transition, Porto emerges as a hub for advanced energy storage solutions. Lithium-ion batteries paired with robust Battery Management Systems (BMS) are ...

This article explores the critical role of BMS in optimizing lithium battery performance, safety, and longevity--key factors for energy storage projects in Porto and beyond.

The battery will be installed next to the Ribatejo combined cycle power station in Portugal. The new scheme is the first of its kind approved in ...

Portugal's battery storage boom steadies prices, slashes blackouts and opens tech roles. Discover how new policies could reshape your power bill.
