DTSC held a public webinar on December 17, 2020, to present information on the recently approved regulation to manage waste photovoltaic modules (PV modules), commonly known as ...

Solar panels sold in the United States need to comply with various standards and regulations, including requirements that cover labeling, ...

China has promulgated policies and regulations for managing PV EOL waste, including the National Solid Waste Law and GB or GB/T standards.

In October 2023, the U.S. EPA announced that it's proposing to add hazardous waste solar panels and specific regulations concerning lithium batteries to the universal waste regulations, ...

Discover how the U.S. manages end-of-life photovoltaic solar panels, including recycling strategies, environmental impact, and evolving policy ...

When solar panels, which typically have a lifespan of more than 25 years, reach the end of their lives and become a waste stream, they must be ...

The first objective of this task is well served by life cycle assessments (LCAs) that describe the energy-, material-, and emission-flows in all the stages of the life of PV.

When solar projects reach the end of their expected performance period, there are several management options. They include extending the performance period through reuse, refurbishment, or repowering ...

PV system owners and operators are obligated under federal and state RCRA regulations to determine if their end-of-life PV modules exhibit a hazardous characteristic.
