This specialized glass, with iron oxide content below 0.015%, achieves light transmittance rates exceeding 91%--compared to 88-89% for conventional solar glass--directly enhancing photovoltaic ...

Double-glass modules boast increased reliability, especially for utility scale PV projects. These include better resistance to higher temperatures, humidity and ...

Are you planning a solar project in Riga and need clarity on photovoltaic module pricing? This guide breaks down the latest price trends, technical specifications, and market dynamics for single-glass ...

Our glass-glass modules are long-lasting, fireproof (class A), and resistant to cold, heat, and moisture. After 30 years, we guarantee 90 percent effectiveness and offer a 30-year warranty.

High-efficiency 610W Solar Panel with TOPCon N-Type bifacial technology, delivering higher energy yield and reliability for commercial and utility-scale solar projects.

Glass-glass module structures (Glass Glass or Double Glass) is a technology that uses a glass layer on the back of the modules instead of the traditional polymer backsheet.

Glass/Glass modules withstand air and moisture and offer best cell protection, while plastic backsheets of glass/foil modules become porous. The Glass/Glass composite protects solar cells against micro ...

Where photovoltaics meet limitless design, where color meets clarity. You're choosing a future where sustainability is clear as day.
