Large-scale solar projects in the Sahara Desert have the potential to significantly reduce greenhouse gas emissions and mitigate climate change by displacing fossil fuel-based electricity generation.

A mere 1.2% of the Sahara's surface area covered with solar panels could generate enough electricity to meet global energy demands. In this article, ...

Researchers imagine it might be possible to transform the world's largest desert, the Sahara, into a giant solar farm, capable of meeting four times ...

Located on the Sahara's doorstep, Noor is the biggest solar power (CSP) plant in the world. Here, thousands of mirrors reflect the sunshine up at a spectacular tower, featuring a unique molten...

The Ouarzazate Solar Power Station, often called the "NOOR" complex, covers more than 3,000 hectares on the edge of the Sahara desert.

As the world grapples with the urgent need to transition away from fossil fuels, Algeria's massive solar power project in the Sahara desert stands as ...

Libya has officially commissioned its inaugural solar power facility in the remote southeastern town of Kufra, deep in the Sahara Desert near Egypt, ...

The idea sounds irresistible: cover a slice of the world's biggest hot desert with solar panels and power entire continents. Yet when scientists, engineers and local communities start doing the ...
