Samoa and New Zealander boat builders is working together to construct Samoa's first-ever electric boat fleet - one of the pioneering electric ...

The island nation's new energy storage power station isn't just about keeping the lights on--it's rewriting the rules of energy independence for small island states.

The design of solar-powered drones has witnessed remarkable technological advancements. Lightweight materials, such as carbon fiber and ...

The HJ Mobile Solar Container comprises a wide range of portable containerized solar power systems with highly efficient folding solar modules, advanced lithium battery storage, and smart energy ...

This expansion added 5MW of upgraded solar capacity along with 2MW of energy storage batteries, making it the first integrated solar-storage power station in Samoa and the entire South Pacific region.

The Navy flew a drone nonstop for over three days to test new long-endurance solar-powered autonomous aircraft technology in maritime ...

It is possible to create a 100% solar powered drone. If this concept works it would be incredible because as long as the sun is up, the drone can fly and you don't even have to worry about...

The mobile refueling station uses solar panels to generate electricity, which powers an atmospheric water generator that pulls moisture from the air. ...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal operating ...

## Samoa drone station uses a 60kWh solar-powered container

From initial system design and engineering to ongoing maintenance, optimization, and performance monitoring, FTMRS SOLAR ensures your photovoltaic and energy storage solutions operate at peak ...
