-----

The domestic structural optimization design for fixed adjustable PV bracket was first proposed by Chen Yuan in 2013, taking the domestic code as a guide and also referring to the foreign design code ...

This paper adopts the Solid Isotropic Material with Penalization (SIMP) method to investigate the structural topology optimization of the L-shaped bracket in the APTS, aiming to ...

This article investigates a flexible photovoltaic bracket's response to wind vibration. A finite element model is established using SAP2000 software for time course ...

For the the actual demand in a Japanese photovoltaic power, SAP2000 finite element analysis software is used in this paper, based on Japanese Industrial Standard (JIS C 8955-2011), describing the ...
