We are offering mini renewable power stations in a Off-Grid shipping Container ready to be deployed worldwide. These include solar PV panels and mountings.

This system, which was connected to the Latvian electricity transmission grid, contributed significantly to energy security and stability, ...

This deal marks the beginning of a major solar energy project at the port of Riga, which will include the installation of solar panels, the production and storage of renewable electricity, and the development ...

Our foldable solar containers combine advanced photovoltaic technology with modular container design, delivering rapid-deployment, off-grid renewable energy with industry-leading efficiency.

Latest developments in BESS technology, photovoltaic foldable container advancements, solar power station products, and industry insights from our team of renewable energy experts.

This is the third solar panel park operating in the Port of Riga, and it is planned to open new green energy plants in several other port companies. Meanwhile one of the largest solar panel ...

This article aims to investigate the viability of reaching off-grid operation with reasonable thermal comfort for a container home within five different climates in China.

This deal marks the beginning of a major solar energy project at the port of Riga, which will include the installation of solar panels, the production ...

Whether it's a single microgrid for a remote facility or a portfolio of systems across multiple sites, our solutions are scalable, efficient, and built for rapid deployment.

Scalable Collaboration on Off-Grid Solar Containers in Riga

We make mobile solar containers easy to transport, install and use. Make the next step towards renewable energy with our Solarcontainer! The challenges of our ...
