---

Summary: Maribor, Slovenia, is embracing innovative energy solutions with containerized energy storage systems. These modular units offer grid stability, renewable energy integration, and cost ...

This project involves a highly deployable, containerized energy storage and power generation solution with 1MWh capacity, using an innovative hydrogen carrier. It will be implemented in remote areas to ...

Such connections can help to balance out supply and demand across regions, which will be increasingly important as variable renewables like solar and wind make up a larger share of electricity generation.

Summary: Slovenia is rapidly adopting advanced energy storage systems to support renewable integration and grid stability. This article explores the latest technologies, market trends, and ...

Our line of containerized generators is easily configurable to the needs of any application, from rental to disaster relief to mining -- with a whole host of value ...

The country is seeking to move away from fossil fuels through electrification of areas of the economy such as transportation and heating with generation resources which emit little or no greenhouse ...

In a two-week test, HyFlex generated electricity using green hydrogen as fuel while connected to the existing shore power system for ships ...

Two battery energy storage systems (BESS) based on lithium-ion cells were installed in Slovenia to increase the flexibility of active power and, thus, the ...

Slovenia's state-owned power market operator Borzen will allocate EUR 20 million (USD 20.9m) in grant funding to new projects for the production ...
