We have extensive experience conducting studies pertaining to the design and deployment of stand alone solar systems into the operations of electric utility ...

Our on-site solar energy kits are capable of providing all necessary power without the need of a grid. Our reliable design means there will be no lapses of power, ...

Partner with SunWize for reliable, cost-effective solar energy solutions that reduce operational costs and improve efficiency across your oil and gas production sites.

We provide solar-powered and hybrid systems engineered for remote or stand-alone applications. These systems are ideal for areas prone to lengthy weather ...

An Off Grid solar Container unit can be used in a host of applications including agriculture, mining, tourism, remote islands, widespread lighting, telecoms and rural medical centres.

Energy storage systems are an important component of the energy transition, which is currently planned and launched in most of the developed and developing countries. The article ...

Single cabinet footprint reduced by over 20%, with multi-unit scalability for increased capacity. High-efficiency liquid cooling technology maintains a battery ...

We design and engineer custom Solar Power Systems for Oilfield Services, Gas Pipelines, Off-shore Drilling, Injection Sites, Wellhead Locations and Related Oil and Gas Service Companies.

Solar PV arrays can be reused and scaled as required by the site, allowing for flexible energy management.

Solar energy storage cabinetized single-phase power supply for drilling sites

Battery Energy Storage Systems (BESS) are also modular, allowing facilities to scale ...
