---

Together with IWB, Axpo has realised one of the largest alpine solar plant in Switzerland at 2500 metres above sea level. The plant has been fully ...

This report highlights Switzerland's continued progress in scaling up solar power deployment, with steady growth in PV installations despite a slowdown from previous record years.

This chart shows the volume of electrical energy produced in Switzerland. It maps total production (green curve) and the volume of energy that is fed directly into ...

Switzerland's electricity mix includes 56% Hydropower, 30% Nuclear and 9% Solar. Low-carbon generation peaked in 2001.

Get to know the projects' power generation capacities in MWp or MWAC, annual power output in GWh, state of location and exact location on the map, name of developer, year of connection to the electric ...

Listed below are the five largest active solar PV power plants by capacity in Switzerland, according to GlobalData's power plants database. GlobalData uses proprietary data and analytics to provide a ...

If all existing buildings were to be optimally improved in terms of energy efficiency, it would be possible to meet the heating requirements of all Switzerland's households through the use of solar collectors.

Solar PV is rapidly growing and currently it is already the second largest source of renewable electricity in Switzerland after hydropower. In 2022, solar PV accounted for 7% of the national electricity ...

Swissolar says PV deployment in Switzerland will likely average 1.5 GW a year through 2027 as the industry adjusts to policy uncertainty and lower feed-in tariffs.
