-----

APM Terminals Valencia is embarking on an ambitious solar energy project as part of APM Terminals' ambition to be carbon neutral by 2040. This initiative underscores the company's ...

Renewable energies in Spain are gradually gaining ground in the market, especially thanks to the measures allowed by the Government. Among them, solar thermal ...

How will Spain's LNG terminal improve energy resilience? Additionally, the terminal plans to enhance energy resilience by installing up to 2MVA of onsite solar panels in Spain, introducing a reefer ...

Gemasolar is a concentrated solar power plant with a molten salt heat storage system. It is located within the city limits of Fuentes de Andaluc&#237;a in the province of Seville, Spain.

The Solar Thermal & Thermal Energy Storage Department of the National Renewable Energy Centre of Spain offers technological ...

La Africana Solar Power Plant - Thermal Energy Storage System. The La Africana Solar Power Plant - Thermal Energy Storage System is a 50,000kW molten salt thermal storage energy storage project ...

The Port of Bilbao has developed an integrated energy model to deliver decarbonisation, resilience and competitiveness, writes CEO Ivan Jimenez Aira.

Picture this - cargo ships docking at sunrise while solar farms flood the grid with cheap energy. By noon, those same batteries that charged overnight now stabilize voltage fluctuations from offshore wind ...

The importance of this project is part of the decarbonisation plan of the Port Authority of Val&#232;ncia (PAV) which envisages an emission neutral port ...
