SOLAR HI-TEMP Heat Transfer Fluid and Anti-Freeze Solution provides optimal heat transfer, freeze and corrosion protection for vacuum tube solar collectors ...

With effective anti-corrosion properties, superior resistance to thermal degradation and freeze protection (down to -25°C), Hydratech Solar thermal fluids are industry proven to maximise heat output, reduce ...

Glysofor Solar serves as a frost protection agent, anticorrosive agent and a heat carrier medium in vacuum tube and plate collector solar plants. Glysofor Solar is an environmentally friendly antifreeze ...

Antifreeze product based on monopropylene glycol, non-toxic protective for solar panels, air conditioning circuits, and cooling circuits

This antifreeze solution is formulated to provide excellent protection against freezing, overheating, and corrosion, ensuring the efficient operation of solar panels and collectors in various climates.

Solar Panel Antifreeze prevents the fluid in solar thermal systems from freezing during cold weather, ensuring the system remain operational and efficient throughout the winter months.

Antifreeze solutions enable solar thermal systems to operate efficiently in sub-zero temperatures, expanding their geographical applicability and market potential. This has opened up ...

AF GLYCOL SOLARTECH -40 is a non-toxic, solvent-based and propylene glycol-based antifreeze additive, especially indicated to protect solar thermal energy ...

Choosing an appropriate antifreeze for solar energy systems involves a myriad of factors adapted to the specific requirements of the ...
