Learn how specific yield (kWh/kWp) is calculated and influenced by location, weather file, module orientation, module selection and BOS efficiency. ...

Welcome, PVOutput is a free service for sharing and comparing PV output data. If you own a solar system please contribute your power output readings. Remember me Forgot Password?

The PV power output (PVOUT), defined as the specific yield, is used to illustrate this potential. PVOUT represents the amount of power generated per unit of the installed PV capacity over the long-term, ...
