SimpleGrip-SQ is designed to attach PV modules to rolled and membrane roofs with pitches from 1/4:12 - 21:12. The base is compressed between two layers of ...

Crestabond is an impressive structural adhesive, specifically designed for demanding applications on commercial and residential metal roofs - trapezoidal or standing seam. It is the perfect solution for ...

We recently caught up with Scott Bader's solar PV expert, Andrew Harvey, on the improvements structural adhesives bring to solar installation, and how they ...

Learn how Crestabond structural adhesives are transforming the solar PV installation process and enhancing efficiency.

For rigid panels, the best adhesive would be M6 bolts. These are rigid panels being mounted on aluminium brackets. I'll actually be replacing one of the factory panels and notice they ...

Bonding between glass and metal materials: used to connect glass and metal materials in PV modules to ensure the overall structure and performance of the module

Discover how structural adhesives are transforming solar PV installation by enhancing durability, reducing weight, and improving efficiency.

Structural bonding of the module to the mounting structure (i.e. back rail) in production or on-site. Integration of photovoltaic panels for the roofing, facade, ...

Here we show how to bond aluminium rails and brackets using Crestabond adhesive.

Looking for non-penetrating solutions for the solar industry? Application of LORD adhesives for solar panel

Structural adhesive to fix photovoltaic bracket

roof mounting is quick and easy.
