Utility EWS AG and developer MW Storage have completed the expansion of a battery energy storage system (BESS) project in Switzerland ...

Inlyte and NTS plan to deploy 2 MW of iron-sodium by 2028 with initial installation in late 2026 Surging global data center energy demand is driving operators to rethink power strategy Inlyte's ...

With 60% of its electricity already coming from hydropower, the country is now blending old-school reservoirs with futuristic battery tech. Think of it as a "Swiss Army knife" approach to ...

"This project helps to stabilize the electricity grid in Switzerland and to optimize the management of our own energy and power capacity in Wettingen."

This initiative involves developing and demonstrating a long-duration energy storage system to enhance resilience at a site in California. In separate Swiss developments from December ...

Swissgrid sees battery storage as a key technology for the energy transition. It not only facilitates the integration of renewable energies, but also increases the flexibility of the entire ...

Based on current scientific knowledge, leading Swiss researchers consider that where large amounts of energy need to be stored for the medium to long-term, technologies such as ...

This article explores cutting-edge storage solutions reshaping grid stability while addressing renewable energy intermittency - a challenge affecting solar, wind, and hydroelectric systems alike.

A new pumped-storage power station, one of the most powerful in Europe, came on stream in canton Valais in southern Switzerland in July 2022.

Swiss Data Center to Pilot Iron-Sodium Battery for Energy Storage The insatiable demand for data is placing

Swiss New Energy Storage Power

unprecedented strain on the world's power grids. Data centers, the ...
