Proponents maintain that state-of-the-art battery energy storage systems are safe, but more localities are enacting moratoriums.

Despite the continuing use of lithium-ion batteries in billions of personal devices in the world, the energy sector now accounts for over 90% of annual lithium-ion battery demand.

A battery energy storage system (BESS) captures energy from renewable and non-renewable sources and stores it in rechargeable batteries (storage devices) for later use.

Most recently, the Infrastructure Investment and Jobs Act of 2021 (IIJA; P.L. 117-58) and P.L. 117-169 (commonly known as the Inflation Reduction Act, or IRA) further expanded and specified this policy ...

The proliferation of lithium batteries in energy storage has drawn attention to the scarcity of lithium itself. As demand surges for electric vehicles ...

China has announced new export control measures targeting a wide range of lithium battery technologies, materials, and manufacturing equipment.

Nauru's recent ban on lithium-based large-scale energy storage systems isn't just local policy - it's a seismic shift in how we approach renewable energy infrastructure.

ALGIERS, April 12 (Xinhua) -- Algeria's Energy Ministry announced Saturday that the state-owned mining group Sonarem has signed a "strategic" agreement with renowned battery expert Karim ...

The country prohibits the use of lithium battery energy storage. The new rules, required under an August 2022 law, are designed to wean the U.S. electric vehicle battery chain away from China and are ...

The country prohibits lithium battery energy storage

Europe and China enforce strict regulations against improper disposal within their territories, but countries such as India and the U.S. have weaker enforcement. These inconsistent ...
