Discover how one factory successfully transitioned to solar energy, overcoming challenges with smart planning, innovative technology, and employee engagement.

With R& D centers in Shanghai and Nanjing, we combine advanced battery technology with strong capabilities in PCS, BMS, and EMS. Our portfolio covers ...

Businesses are increasingly investing in their own power generation systems, such as solar panels and microgrids, in response to rising energy costs, grid instability, and climate-related ...

OverviewDescriptionFossil fuel consumptionEconomic impactPerformanceEnvironmental impactsIn popular cultureExternal linksThe Ivanpah Solar Electric Generating System is a concentrated solar thermal plant located in the Mojave Desert at the base of Clark Mountain in California, across the state line from Primm, Nevada. It was slated to close in 2026, but that decision has been reversed by the California Public Utilities Commission. The facility derives its name from its proximity to Ivanpah, California, which lies within the Mojave National Preserve
