These new regulations, which will take effect on January 1, 2026, focus on energy communities and minimum remuneration. The aim of these measures is to encourage self ...

These minimum requirements are published on our website: Grid connection - Connecting a system to the transmission grid. By publishing this information, we are establishing ...

All equipment and installations connected to the Swiss power grid must fulfil the requirements in the documents listed on this page at all times.

Distribution system operators can now set maximum feed-in power at the connection point, reducing delays in connecting solar systems and limiting grid expansions.

This document defines the technical and operational connection conditions for converter-based energy storage systems (CESS) that are to be connected to the transmission system (TS) in Switzerland.

Explore the implications of current legislative developments in Switzerland, particularly regarding solar power plants within the country.

Does the new Electricity Act provide the necessary framework conditions for the integration of solar energy? Some key tools have been established, but others are still needed.

Switzerland is expanding rules for rooftop solar, energy storage, and energy communities to expand self-consumption and ease pressure on the grid. The new regulations, set to take effect in ...

The DERlab database for Standards and Grid Codes offers a comprehensive overview on international
