Fortunately, how to fix broken wire on solar lights is a straightforward process that can save you the cost of replacing the entire unit. With a few basic ...

Repairing a solar bracket can seem challenging, yet it is a manageable task if approached methodically. When dealing with a damaged ...

Solar panel mount repair made easy! I show how to fix a loose drill-less plastic solar panel bracket after the VHB tape failed on my RV solar install.

One solar panel is not enough to power my trailer comfortably, so I need to buy 1 ...

1) Calculate/measure where the panel mounting brackets contact the roof. 2) Apply a patch of Eternabond tape extending minimum of three inches in every direction from where the bolt ...

If a broken bracket has caused the wire of your braces to jut out and poke, prod, or cut your cheek or gums, you need to fix the problem so you remain comfortable until your ...

I'm a newbie to solar and made my first (and hopefully last) mistake. I purchased a Kimbo camper a couple weeks ago. It comes with two Bluetti system batteries (1209 watts) and 2 ...

First, unscrew the light from the ground and remove the top. Next, locate the broken wire and use pliers to twist it back together. Finally, screw the ...

I was not careful with the solar rock guards (plexiglass) and broke the attachment on the non hinge side. So the bracket sheared right at the edge of the rock guard.

To fix solar lights not working, check and remove the battery pull tab, replace or deep charge the batteries, repair any damaged wiring, clean the solar panels, and ensure they're ...
