Discover the world's largest solar farms in 2025. Complete rankings, capacity data, locations, and analysis of mega solar projects transforming global energy.

The following is a list of photovoltaic power stations that are larger than 500 megawatts (MW) in current net capacity. Most are individual photovoltaic power stations, but some are groups of co-located plants owned by different independent power producers and with separate transformer connections to the grid. Wiki-Solar reports total global capacity of utility-scale photovoltaic plants to be some 96 GWAC which generated 1....

Find a list of solar photovoltaic plants that are currently considered the largest on the globe. We have listed the ground-mounted utility-scale stations, which have already been connected to the power ...

This 938 MW AC plant in Abu Dhabi in the UAE became the world's largest single solar power station when commissioned in June 2019 - a position ...

China is the world's largest producer of solar energy and had four of the 15 largest solar plants in 2021.

China is building an enormous network of clean energy industries on the Tibetan Plateau, the world's highest. The intention is to harness the region's ...

The Noor Abu Dhabi Solar Power Project is the world's largest single-site solar farm, with a 1.2 GW capacity covering 1,977 acres. That means ...

In June 2024, China connected the 3.5 GW Midong solar project near [r#252;mqi](#) in Xinjiang to the grid, making it, at that moment, the world's largest ...

Fully commissioned in June 2024, the Xinjiang Midong Solar Park is one of the largest solar power plants in the world. It ...
