The EAPP also offers Uganda the opportunity to access a more diverse energy mix from neighboring countries, potentially including geothermal power from Kenya and natural gas from Tanzania

With an annual energy sales growth rate of 17%, additional electricity generation investment is required to avoid a deficit. Analysts believe a large demand exists, particularly among ...

A total of 59 mini hydropower sites with a potential of about 210 MW have been identified through different studies. This gives a fair picture of the small and mini hydro potential in the country. Some of ...

Uganda's transmission network stands at 2569.8 kilometres of electric lines while the distribution network is at 45,423.1 km. As a result, several ...

After an initial period of disagreement between the Government of Uganda and the petroleum exploration companies, the two sides agreed in April 2013 to ...

The analysis does not just look at Uganda in isolation but considers how global trends are influencing and opening up new opportunities, notably driven by rapidly evolving clean technology costs and ...

As such, it brings datasets together in one place, organize them, keep them updated, and make public data available to all stakeholders.

Uganda has also developed several sub-sectoral policies to support this strategy, such as the 2008 National Oil and Gas Policy (currently under review), the 2007 Renewable Energy Policy, and the ...

It also emphasises the need for better planning and coordination amongst all stakeholders, and this will be achieved with an Integrated Resource Plan to be used for an appropriate balance between ...
