---

A new Dutch foldable container technology will be tested in Chicago in 2022 that could demonstrate how to reduce empty container ...

This study seeks to explore the effectiveness of employing foldable containers (FLDs) in liner shipping to reduce relocation and the ...

FLDs can be folded and bundled four high when repositioned, reducing space by 75%, aiding efficient utilization, and lowering the handling burden at ports, meaning they may be more cost ...

We design foldable intermodal shipping containers that exceed ISO and CSC standards, and the systems needed to fold them standing ...

Foldable containers have the potential to enhance the cost efficiency of the logistics industry and improve the problem of space allocation at seaports.

COLLAPSECON containers are collapsed at speed by the COLLAPSECON Operating Station, the only automated solution on the market. It is designed to seamlessly integrate into ...

We believe that using foldable containers can enhance the efficiency of relocating empty containers compared with standard ones, even when faced with transport capacity limitations.

Focusing on the most popular container in the market today (40-foot), HCI has continually evolved the main structure and design to ...

"Whether it is saving cost or space, our containers create a safe and more efficient operating and storage system at a port, terminal or depot. "This is ...

# Ultra-high efficiency of foldable containers at port terminals

"Whether it is saving cost or space, our containers create a safe and more efficient operating and storage system at a port, terminal ...
