OverviewPhotovoltaicsHistorySolar thermal powerGenerationGovernment supportState challenges with solar powerPublic opinionIn 2011, California's goal to install 3,000 MW of distributed generation by 2016 was expanded to 12,000 MW by 2020. California has more photovoltaics installed than any other federal state, and 48% of the U.S. total in 2010. For the first time in 2008 the installed photovoltaics exceeded the state's 354 MW of solar thermal (CSP). There are plans to build over 15,000 MW of utility scale p...

SOLV Energy delivers the large-scale solar and battery storage projects that keep these industries powered -- on time and at massive scale. With proven expertise, deep resources ...

Here is a map of all utility-scale solar farms in California. Hover over a solar farm to view information on each project like their name, capacity and ...
