All-encompassing, fast, and resilient solution for disaster preparedness. A ready-to-install 2-3 kVA power module with 4-6 solar panels and lithium battery storage. ...

The client, a newly established water plant in Nigeria, needed a reliable and robust commercial solar + storage solution to ensure uninterrupted ...

The Solar Powered Water Systems (SPWS) Design Manual is a step forward in strengthening the capacities of the sector institutions and stakeholders design, install, operate and maintain the solar ...

Implemented by the Ministry of Water and Environment (MWE), the project is a significant step towards providing sustainable water solutions for both domestic and agricultural use.

Three Phase 150KVA Off Grid Solar Power System. Read more commonly asked questions or learn about what solar storage is.

Bidi Bidi Refugee Settlement is situated in North West Uganda. It covers an area of approximately 250 square kilometers, hosting around 270,000 South Sudanese ...

A Solar Water Pumping System uses energy from the sun to power electric water pumps for agriculture, livestock, drinking water supply, or remote irrigation, eliminating the need for grid electricity or diesel ...

This project leveraged renewable solar energy to power water pumping and distribution systems, representing a sustainable and cost-effective approach to expanding water coverage and improving ...

This project, now underway in the Bukyerimba region, will deliver safe drinking water through a solar-powered tower and three distribution ...

Water plant uses 250kW off-grid solar container from Uganda

This 250kW three-phase hybrid inverter redefines large-scale power conversion, offering containerized deployment and ultra-high efficiency for mining operations, data center ...
