A capacitor is a passive device on a circuit board that stores electrical energy in an electric field by virtue of accumulating electric charges on two close surfaces insulated from each other. This is a list of known capacitor manufacturers, their headquarters country of origin, and year founded. The oldest capacitor companies were founded over 100 years ago. Most older companies were founded during the AM radio era, which includes the World War II era and post war era. As the demand for advanced electronics con...

As Split positions itself as Croatia's smart energy hub, super farad capacitors are proving indispensable. Whether you're upgrading a solar array or electrifying transport, these devices offer the speed and ...

The company is working with German industrial giant Siemens to develop a fully automated production line for the new factory, which Skeleton ...

Headquartered in Milan, Italy, Italfarad specializes in the production of a wide range of capacitors, including aluminum electrolytic, film, and ceramic capacitors.

Skeleton Technologies, an Estonian energy storage technology firm, announced recently that it will develop a new plant producing supercapacitors ...

Estonian energy storage company Skeleton Technologies is partnering with Siemens to build Europe's largest supercapacitor factory in ...

Skeleton Technologies and Siemens are announcing a far-reaching technology partnership for the development, planning and implementation of a ...

Estonian power infrastructure developer Skeleton Technologies has officially opened its EUR220 million (\$192.5m) SuperFactory in Markranstädt, near ...

Western European super farad capacitor production plant

Skeleton has opened a EUR220 million SuperFactory in Leipzig, Germany, producing up to 12 million lithium-free supercapacitor cells annually. ...
