---

2025 is here, and the renewable energy sector is on the brink of remarkable transformations. From smarter technologies to innovative land use, this year ...

Solar Energy Information. Read the latest news and techniques for efficient solar photovoltaic power, new solar energy systems and more.

The past few years have seen a frankly astounding acceleration in the rate of its deployment, with total generation ...

Solar and wind growth met all new power demand in 2025, pushing fossil generation to stall for the first time since the pandemic.

Worldwide solar and wind power generation has outpaced electricity demand this year, and for the first time on record, renewable energies combined generated ...

Join us at Solar Power World as we cover the world of solar news on technology, development and installation on a daily basis.

In 2024, between 554 GWdc and 602 GWdc of PV were added globally, bringing the cumulative installed capacity to 2.2 TWdc. China continued to dominate the global market, ...

This report unpacks the concept of 24-hour electricity supply with solar generation -- how solar panels, paired with batteries, can deliver clean, reliable electricity around the clock.

Following 35% growth, solar has passed hydro on US grid Coal makes a bit of a comeback, if only by accident.

# What are the recent changes in solar power generation

Almost 70 gigawatts (GW) of new solar generating capacity projects are scheduled to come online in 2026 and 2027, which represents a 49% increase in U.S. solar operating capacity ...
