The global energy landscape is undergoing a fundamental transformation driven by the urgent need to decarbonize power systems and achieve net-zero emissions targets. This transition ...

Conclusion: Adapting to the New Reality The cancellation of China's export tax rebates for energy storage systems marks a watershed moment for the global renewable energy industry. While ...

Goldman Sachs warns: Aging power grids in Europe and US become bottleneck for AI development, while China gains advantage in AI era ...

Federal Energy Regulatory Commission Order 2222 is expected to accelerate aggregated DER participation in wholesale markets. 30 In 2026, developers are ...

Once PV panels, inverters and battery energy storage system (BESS) have reached the end of their individual life-cycles, they will form a large amount of electronic waste.

China subsidy cuts push solar PV into pricing reset phase As the giant Asian tightens fiscal policy and removes export rebates, global solar PV prices adjust upward. Yet for Argentine ...

The North American market for photovoltaic energy storage integrated with hydrogen production and hydrogenation systems is experiencing rapid growth driven by the increasing ...

This work was authored in part by the National Renewable Energy Laboratory (NREL), operated by Alliance for Sustainable Energy, LLC, for the U.S. Department of Energy (DOE) under Contract No. ...

The rapid growth of the photovoltaic (PV) industry has made it an important force in driving the global energy transition and carbon neutrality goals. The global installed PV capacity is ...
