Find the most up-to-date statistics about solar photovoltaic energy in the United Kingdom (UK)

The 2010s marked a significant period for solar power in the UK. By 2012, the number of solar installations skyrocketed, with the country ranking ...

Much like capacity, electricity generation increased steadily from 1920 onwards, and experienced the fastest rate of change during a similar period to capacity, growing rapidly from 1950 until...

Solar power generation in Britain so far this year has surpassed the total for 2024 as panels are rapidly installed amid favourable weather, ...

Are you looking for an epic rundown of solar energy history in the UK? In this article, I'll explore the very early days of photovoltaics and delve deeper into the UK's relationship with solar ...

Between 2010 and 2015, solar power in the UK benefitted from feed-in-tariffs--guaranteed prices for power generation. In this period, British ...

UK's fleet of wind, solar and biomass power plants set records in 2025, Carbon Brief analysis shows, but electricity from gas still went up.

UK solar has set new generation records in the first half of 2025 as deployment gathers pace. Solar power generation in Great Britain was up 32% in the first six months of 2025 compared...

In 2025, wind, solar, hydro and biomass generated more than 127 terawatt hours (TWh) of electricity in Great Britain, according to BBC analysis of ...
