The El-Medina solar and storage project is aligned with Tunisia's National Climate and Energy Strategy. The country has set a target to generate 35 percent of its electricity from renewable ...

The Government of Tunisia is taking steps to diversify its energy generation mix by bringing on hydropower and solar energy.

Generation sites are marked with different sized circles to show sites of 1-9MW, 10-99MW, 100-499MW and 500MW and above. The bottom right of ...

This makes Tunisia vulnerable to global fuel price changes and supply risks. By increasing the use of renewable energy sources such as solar power, the country aims to improve energy security and ...

This article explores how battery storage, pumped hydro, and innovative technologies can transform Tunisia's power infrastructure while addressing challenges like solar intermittency and peak demand ...

Tunisia's energy storage power generation sector is transforming faster than a desert sunset. With solar irradiation levels hitting 5.3 kWh/m²/day and wind speeds reaching 9 m/s in coastal areas, this North ...

Tunisia has significant potential for renewable energy, particularly wind and solar power. However, the country is still heavily dependent on fossil gas for electricity generation and is currently facing an ...

Tunisia powers ahead: STEG eyes EUR40m EBRD-backed solar-plus-storage to firm the grid, slash fuel imports, shift sun to peaks, and unlock bankable, reliable clean energy.
