Since 2021, Florida, California and Texas have consistently ranked as the top states for solar PV installations. By 2040, solar power is anticipated to ...

Discover the top countries with the most solar power installed in 2025. Explore global solar growth trends, annual installation rates, and how ...

This is a list of countries and dependencies by electricity generation from renewable sources. Renewables accounted for 32% of electric generation in 2024. Renewables consist of hydro (44%), wind (25%), solar (22%), biomass (6%) and other renewables (1%). In 2023 China produced 32% of global renewable electricity, followed by the United States (11...

Employment Outlook Capacity Generation The most important statistics Solar power capacity additions in the U.S. 2005-2024 Cumulative solar ...

China is undoubtedly the global leader in solar energy generation and consumption, boasting an installed capacity of over 393GW in 2022 - a significant portion of the world's total solar ...

Data and analysis including a list of solar power in every country in the world, countries with the most solar power, and countries that generate the highest ...

California is the top state in this list, with about 34.4% of its electricity coming from solar generation, Nevada is second on the list with 28.8% of its electricity coming from solar energy.

About this data Share of electricity generated by solar power Measured as a percentage of total electricity produced in the country or region.

Solar energy capacity is growing rapidly, driving the global transition to renewable energy. This graphic

Where is the highest solar power generation

visualizes the top 15 countries by cumulative ...

To access additional data, including an interactive map of global solar farms, a downloadable dataset, and summary data, please visit the Global Solar Power Tracker on the Global ...
