If the modules need to be temporarily stored after unloading, it is recommended to keep sufficient space between each pallet to avoid scratching the carton or pallet during the second transfer.

To prevent the panels from falling while removing them from the pallet, move the whole pallet next to a wall or other firm support structure, as shown below. Cut off all remaining straps and ...

Modern photovoltaic modules are tougher than your gym-obsessed neighbor, but they've got Achilles' heels. A 2023 NREL study found 12% of solar panel failures trace back to improper ...

In order to prevent the safety of placing and unpacking modules affected uneven ground, please choose flat ground when unloading.

Unpacking of PV modules should always be done in the vertical manner by two persons as shown in the diagram. Also care should be taken for falling over one module to the other inside the ...

To ensure the safety of loading, unloading, unpacking and storage of PV modules, please read this manual carefully. When you need to unpack and install the modules, you can search and ...

Once you unpack your modules, check the module frame serial number and model label against the shipping label. The serial number is the unique identifier of each PV module. A protected ...

Safety note Please read the following safety instructions carefully before unloading and unpacking your solar modules. It is crucial to follow the outlined measures and guidelines for the safe ...

Uneven surfaces increase the risk of tipping or dropping the load during unloading. The platform should have a non-slip surface (e.g., textured steel or rubber mats) to prevent accidents ...
