The Inflation Reduction Act incentives reduce renewable energy costs for organizations like Green Power Partners - businesses, nonprofits, ...

Meanwhile, GEM's Global Solar Power Tracker reported nearly 900 GW of operating distributed solar capacity worldwide, underscoring the growing importance of rooftop and ...

GEM interface showing the Solar Mapping Theme which includes the Solar Photovoltaic Facilities Database, solar power plant sites from the Energy ...

From solar tax credits to state-specific rebates and utility-sponsored programs, there's a wide range of green energy incentives available to help ...

Whether to choose the ITC or the PTC depends largely on the cost of the project, the amount of sunlight available, and whether it is eligible for any bonus tax credits. See an example calculation below.

Developers and power plant owners plan to add 62.8 gigawatts (GW) of new utility-scale electric-generating capacity in 2024, according to our ...

Energy generation from renewables continued its steady upward trend, as a result of increases in solar generation (and despite a drop in wind and hydro generation).

ArchitectureInclusion CriteriaStatus CategoriesTechnology TypesResearch ProcessWiki PagesMappingSummary TablesGlobal Solar Power Tracker Release NotesThe Global Solar Power Tracker includes photovoltaic (PV) and solar thermal electricity generating projects. Solar projects for captive industry, including hydrogen production, are tracked. The Global Solar Power Tracker aims to comprehensively track all operating utility-scale solar project phases with capacities greater than 1 MW, and all announc...See more on gem.wikiIRSResidential Clean Energy Credit - Internal Revenue ServiceThose
