-----

The countries with the largest market volume for new wind turbines were in 2024: China (86,7 GW), Brazil (5,4 GW), United States (4,2 GW), India (3,4 GW), Australia (3,3 GW), Germany ...

The Global Wind Power Tracker (GWPT) is a worldwide dataset of utility-scale, on and offshore wind facilities. It includes wind farm phases with capacities of 10 megawatts (MW) or more.

The countries with the most total capacity of wind energy have also seen the greatest increase in both onshore and offshore wind energy production ...

Also includes information on each country's actual yearly production ...

Renewables 2025 Global Status Report Collection. A comprehensive annual overview of the state of renewable energy.

Cumulative installed wind energy capacity including both onshore and offshore wind sources, measured in gigawatts (GW).

China is by far the largest installer of wind power in the world, more than tripling the second-ranked United States. As of the end of 2024, China had ...

Production capacity (MW) Countries - Statistics - Online access - The Wind Power

This visual shows the top 15 countries by total installed wind turbine capacity, based on data from the Energy Institute's 2025 Statistical Review of ...
