A study was done, at the national level, which will allow the development of an energy policy for Timor-Leste. The study was concluded on the 29 May and analysed several sources available in our ...

Hybrid energy solutions enable telecom base stations to run primarily on renewable energy sources, like solar and wind, with the diesel generator as a last resort. This reduces emissions, aligns with ...

The East Timor Renewable Energy Electrification Plan consists on the thorough analysis of wind, solar and hydro resources (including wind measurement stations installation).

Our analysts track relevant industries related to the Timor Leste Offshore Wind Energy Market, allowing our clients with actionable intelligence and reliable forecasts tailored to emerging regional needs.

Based on West Timor data, this study concludes that wind power is probably not economic in coastal areas, but it may prove to be economic in the uplands and mountains of Timor-Leste both for grid ...

EdTL's average cost of generation is high, and around two to three times the average retail tariff. This is due to the high cost of diesel oil used in these four ...

The document provides a table of contents for a feasibility study report on a 150 kV transmission line and substation project in Timor-Leste.

This Perspective paper aims to elucidate the influence of Timor-Leste's improvements in electricity access on its national development outcomes and how these may be enhanced, with a ...

Whilst public financial management in Timor-Leste is broadly adequate, there is a lack of transparency with respect to public finances and service delivery performance. Approval processes are ...
