Clean power surpassed 40% of global electricity generation in 2024, driven by record growth in renewables, especially solar. Heatwaves contributed to high growth in electricity demand ...

Find up-to-date statistics and facts on the global solar photovoltaic industry.

Global renewable power generation and change by technology, 2024 and 2030 - Chart and data by the International Energy Agency.

The Global Solar Atlas provides a summary of solar power potential and solar resources globally.

Share of electricity production from solar Share of electricity production from wind Share of primary energy from hydroelectric power Share of primary energy from renewable sources Share of primary ...

The share of electricity generation from fossil fuels stagnated in 2025, with the decline in lignite-based electricity generation being offset by rising natural gas ...

The worldwide growth of photovoltaics is extremely dynamic and varies strongly by country. In April 2022, the total global solar power capacity reached 1 TW, ...

Renewable energy statistics 2025 provides datasets on power-generation capacity for 2015-2024, actual power generation for 2015-2023 and renewable energy balances for over 150 countries and areas for ...

Data and analysis including a list of solar power in every country in ...
